Hakonechloa Golden Variegated Grass

Hakonechloa macra 'Aureola'

Height: 14 inches

Spread: 16 inches

Sunlight: ● ●

Hardiness Zone: 4

Other Names: Japanese Woodland Grass

Ornamental Features

Hakonechloa Golden Variegated Grass is primarily valued in the garden for its cascading habit of growth. Its attractive grassy leaves are green in color with showy gold variegation. The foliage often turns tan in fall.

Landscape Attributes

Hakonechloa Golden Variegated Grass is a dense herbaceous perennial with a shapely form and gracefully arching foliage. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Hakonechloa Golden Variegated Grass is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Growing Since 1885

Planting & Growing

Hakonechloa Golden Variegated Grass will grow to be about 14 inches tall at maturity, with a spread of 16 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Hakonechloa Golden Variegated Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
