

## Mozart Rose

*Rosa 'Mozart'*

Height: 5 feet

Spread: 8 feet

Sunlight: ☐ ☒

Hardiness Zone: 5b

Group/Class: Hybrid Musk Rose

### Description:

This variety is exceptional as a large cascading shrub but branches are long enough to train on a wall or trellis; beautiful and elegant clusters of pink blooms with white centers create a visual symphony in the garden

### Ornamental Features

Mozart Rose features showy clusters of pink flowers with gold eyes and a white ring at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

### Landscape Attributes

Mozart Rose is a multi-stemmed deciduous shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Mozart Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

**Planting & Growing**

Mozart Rose will grow to be about 5 feet tall at maturity, with a spread of 8 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
