

Mrs. B.R. Cant Rose

Rosa 'Mrs. B.R. Cant'

Height: 8 feet

Spread: 8 feet

Sunlight: ☐

Hardiness Zone: 6b

Group/Class: Hybrid Tea Rose

Description:

This wonderfully fragrant variety produces large, fully double, rose pink flowers on a large growing shrub with strong stems; rich compound leaves are deep green and glossy; perfect for sunny mixed borders, screening, or cutting gardens

Ornamental Features

Mrs. B.R. Cant Rose features showy fragrant rose cup-shaped flowers with pink overtones, gold eyes and hot pink streaks at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Mrs. B.R. Cant Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Mrs. B.R. Cant Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Mrs. B.R. Cant Rose will grow to be about 8 feet tall at maturity, with a spread of 8 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
