

Veins Of Truth Daylily
Hemerocallis 'Veins Of Truth'

Height: 32 inches

Spread: 26 inches

Spacing: 20 inches

Sunlight: ☐ ☒

Hardiness Zone: 4b

Description:

Striking pink blend trumpets with yellow centers, ruffled edges, and contrasting deep red eyezones that radiate outward; great grassy texture and form; tetraploid; a spectacular color addition to the garden or border

Ornamental Features

Veins Of Truth Daylily features bold salmon trumpet-shaped flowers with shell pink overtones, yellow throats and a dark red ring at the ends of the stems in mid summer. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the year.

Landscape Attributes

Veins Of Truth Daylily is an herbaceous evergreen perennial with a shapely form and gracefully arching foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Veins Of Truth Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

Veins Of Truth Daylily will grow to be about 26 inches tall at maturity, with a spread of 26 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
