

Glitterati™ Ice Queen Geranium
Pelargonium 'Glitterati Ice Queen'

Height: 18 inches

Spread: 15 inches

Spacing: 12 inches

Sunlight: ☐ ☒

Hardiness Zone: (annual)

Description:

A spectacular variety presenting bright scarlet flowers over mounds of vibrant variegated foliage all season long; a wonderful addition to containers or landscapes

Ornamental Features

Glitterati Ice Queen Geranium's attractive tomentose round palmate leaves remain bluish-green in color with showy white variegation throughout the year on a plant with an upright spreading habit of growth. It features bold clusters of lightly-scented scarlet flowers at the ends of the stems from late spring to early fall. The flowers are excellent for cutting.

Landscape Attributes

Glitterati Ice Queen Geranium is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It has no significant negative characteristics.

Glitterati Ice Queen Geranium is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Glitterati Ice Queen Geranium will grow to be about 15 inches tall at maturity, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Glitterati Ice Queen Geranium is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
