Pleasure Rose Rosa 'JACpif'

Height: 4 feet Spread: 3 feet Sunlight: **O** Hardiness Zone: 5b

Group/Class: Floribunda Rose

#### **Description:**

Pleasure Rose flowers Photo courtesy of NetPS Plant Finder

Bushy and upright in form, this variety produces classy rose-pink double blooms that fade to cream; a tremendous visual impact when massed in the garden; an extraordinary cut flower; slightly fragrant

#### **Ornamental Features**

Pleasure Rose features showy lightly-scented pink flowers with gold eyes at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

#### Landscape Attributes

Pleasure Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Pleasure Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Pleasure Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
