

## Infinitini® Purple Crape Myrtle

*Lagerstroemia indica 'G2X13368'*

Height: 4 feet

Spread: 4 feet

Sunlight: ☐ ☒

Hardiness Zone: 6a

Other Names: Crape Myrtle, Crepe Myrtle

Group/Class: Infinitini Series

### Description:

This beautiful and delicate looking dwarf crape myrtle produces volumes of vivid purple frilly blooms over medium green foliage in summer; a captivating focal point for the garden or border; also good for container planting

### Ornamental Features

Infinitini Purple Crape Myrtle is bathed in stunning panicles of purple frilly flowers with fuchsia overtones at the ends of the branches from early to late summer, which emerge from distinctive brick red flower buds. It has green deciduous foliage. The glossy oval leaves do not develop any appreciable fall color.

### Landscape Attributes

Infinitini Purple Crape Myrtle is a dense multi-stemmed deciduous shrub with a mounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It has no significant negative characteristics.

Infinitini Purple Crape Myrtle is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Groundcover
- Container Planting

**Planting & Growing**

Infinitini Purple Crape myrtle will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Infinitini Purple Crape myrtle makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
