

Aurea Densa Arborvitae
Thuja orientalis 'Aurea Densa'

Height: 15 feet

Spread: 12 feet

Sunlight: ☐ ☒

Hardiness Zone: 6a

Other Names: Platycladus orientalis

Description:

A beautiful garden detail shrub featuring dense, bright yellow evergreen foliage which fades to lime green, forms a compact ball shape, eventually becoming quite large; very adaptable, protect from drying winter winds

Ornamental Features

Aurea Densa Arborvitae is a dwarf conifer which is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has attractive gold evergreen foliage which emerges chartreuse in spring. The scale-like sprays of foliage are highly ornamental and turn harvest gold in the fall, which persists throughout the winter.

Landscape Attributes

Aurea Densa Arborvitae is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Aurea Densa Arborvitae is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Aurea Densa Arborvitae will grow to be about 15 feet tall at maturity, with a spread of 12 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 70 years or more.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
