

Polar Ice Agapanthus *Agapanthus 'Polar Ice'*

Plant Height: 18 inches

Flower Height: 3 feet

Spread: 18 inches

Sunlight: ☐ ☒

Hardiness Zone: 6b

Other Names: Lily of the Nile, African Lily

Description:

This variety produces a mound of strappy green foliage; snowy white flower clusters rise in mid-summer on towering stems; a perfect accent plant for indoor containers in bright areas

Features & Attributes

Polar Ice Agapanthus features bold clusters of white trumpet-shaped flowers rising above the foliage from mid to late summer. The flowers are excellent for cutting. Its narrow leaves remain dark green in color throughout the year.

This is an herbaceous houseplant with a rigidly upright and towering form. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Polar Ice Agapanthus can be expected to grow to be about 18 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
