Description:

This attractive low growing shrub offers medium green glossy foliage and sweetly fragrant blooms in the dead of winter, unlike most species; flowering is followed by red berries that turn black over summer and persist until the following winter

Ornamental Features

Western Hills Himalayan Sweet Box is primarily grown for its highly ornamental fruit. It features an abundance of magnificent black berries in early summer. It has attractive green evergreen foliage. The glossy narrow leaves are highly ornamental and remain green throughout the winter. It features dainty clusters of fragrant creamy white flowers along the branches from early fall to late winter.

Landscape Attributes

Western Hills Himalayan Sweet Box is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Western Hills Himalayan Sweet Box is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Western Hills Himalayan Sweet Box will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Western Hills Himalayan Sweet Box makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
