Height: 30 inches

Spread: 30 inches

Sunlight:

Hardiness Zone: 4

Group/Class: Shrub Rose

Description:

One beautiful, tough rose; dark green foliage with a touch of red stays clean all season; compact rounded form covered with red double blooms; excellent massed in groupings; all roses need full sun and well-drained soil

Ornamental Features

Como Park Rose is blanketed in stunning lightly-scented double red flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

Como Park Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Como Park Rose is recommended for the following landscape applications;

- Hedges/Screening
- General Garden Use
- Groundcover

Planting & Growing

Como Park Rose will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
