Plant Height: 2 inches

Flower Height: 4 inches

Spread: 15 inches

Spacing: 12 inches

Sunlight: ○ ◐

Hardiness Zone: 6

Other Names: Miniature Daisy

**Description:**

This lovely ground hugging variety produces a long blooming display of tiny white flowers above fine, glossy green foliage in late spring; great for edging or a small area groundcover; will tolerate moderate foot traffic once established

**Ornamental Features**

Miniature Mat Daisy features delicate white daisy flowers with yellow eyes at the ends of the stems from late spring to early summer, which emerge from distinctive red flower buds. Its small glossy oval leaves remain dark green in color throughout the year.

**Landscape Attributes**

Miniature Mat Daisy is a dense herbaceous evergreen biennial with a ground-hugging habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a high maintenance plant that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Miniature Mat Daisy is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

**Planting & Growing**

Miniature Mat Daisy will grow to be only 2 inches tall at maturity extending to 4 inches tall with the flowers, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and tends to be biennial, meaning that it puts on vegetative growth the first year, flowers the second, and then dies. However, this species tends to self-seed and will thereby endure for years in the garden if allowed.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This species is not originally from North America.

Miniature Mat Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
