Height: 3 feet

Spread: 4 feet

Sunlight: ○ ◐ ●

Hardiness Zone: 4

Other Names: Wintercreeper Euonymus

Description:

A spreading broadleaf evergreen shrub with sunny yellow-gold foliage; use in the garden as a color accent or for a bold mass planting

Ornamental Features

Noonday Sun Wintercreeper has attractive gold evergreen foliage which emerges yellow in spring on a plant with a round habit of growth. The glossy oval leaves are highly ornamental and remain gold throughout the winter. It produces orange capsules from mid to late fall.

Landscape Attributes

Noonday Sun Wintercreeper is a multi-stemmed evergreen shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Noonday Sun Wintercreeper is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Groundcover

Planting & Growing

Noonday Sun Wintercreeper will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
