Height: 24 inches

Spread: 24 inches

Sunlight:

Hardiness Zone: 4

Group/Class: Miniature Rose

Description:

Beautifully radiant white blooms with salmon-pink petal edges, and butter yellow centers; great for smaller garden areas and containers

Ornamental Features

X-Rated Rose features showy double white flowers with buttery yellow eyes and salmon edges at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges brick red in spring. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

X-Rated Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

X-Rated Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

X-Rated Rose will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
