Height: 18 inches

Spread: 18 inches

Sunlight: ◐ ●

Hardiness Zone: 4

Other Names: Japanese Woodland Grass

Description:

Graceful arching grassy foliage is creamy white with green stripes; almost bamboo-like; this variety prefers shady areas; beautiful along pathways, edges and containers; provide good drainage; pink and rose color tones in fall

Ornamental Features

Fubuki Hakone Grass is primarily valued in the garden for its cascading habit of growth. It attractive grassy leaves are white in color with prominent green stripes. As an added bonus, the foliage turns a gorgeous rose in the fall.

Landscape Attributes

Fubuki Hakone Grass is a dense herbaceous perennial grass with a shapely form and gracefully arching stems. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Fubuki Hakone Grass is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Fubuki Hakone Grass will grow to be about 18 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Fubuki Hakone Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
