Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 7

Other Names: Paris De Yves St. Laurence Rose

Group/Class: Hybrid Tea Rose

Description:

Named after the popular fragrance, this variety produces luxurious, large, deep pink full blooms, over contrasting deep green foliage that is disease resistant; great for the garden, containers, or along sunny shrub borders

Ornamental Features

Paris D'Yves St. Laurence Rose features showy lightly-scented fully double pink flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Paris D'Yves St. Laurence Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Paris D'Yves St. Laurence Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Paris D'Yves St. Laurence Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
