Plant Height: 12 inches

Flower Height: 24 inches

Spread: 16 inches

Sunlight: ○ ◐

Hardiness Zone: 7

Other Names: Agapanthus, Lily of the Nile, African Lily

Description:

This variety produces a mound of luxurious narrow green foliage; clusters of deep purple-black nodding trumpets appear in mid-summer on tall stems; perfect as an accent plant in the garden, or massed along borders

Ornamental Features

Black Drooping Lily-Of-The-Nile features bold nodding deep purple trumpet-shaped flowers with black overtones rising above the foliage in mid summer, which emerge from distinctive black flower buds. The flowers are excellent for cutting. Its narrow leaves remain dark green in color throughout the year.

Landscape Attributes

Black Drooping Lily-Of-The-Nile is an herbaceous evergreen perennial with a rigidly upright and towering form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Black Drooping Lily-Of-The-Nile is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Black Drooping Lily-Of-The-Nile will grow to be about 12 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 16 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Black Drooping Lily-Of-The-Nile is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
