Brigadoon St. John's Wort

Hypericum calycinum 'Brigadoon'

Height: 16 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Aaron's Beard

Description:

A beautiful variety with chartreuse new foliage that matures to yellow with orange highlights in full sun; subtle yellow flowers in summer; makes a fantastic addition to the color garden; widely adaptable but thrives best in moist, well-drained soil

Ornamental Features

Brigadoon St. John's Wort has attractive orange-variegated yellow foliage which emerges chartreuse in spring on a plant with an upright spreading habit of growth. The oval leaves are highly ornamental but do not develop any appreciable fall color. It has masses of beautiful yellow buttercup flowers at the ends of the branches from early summer to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting.

Landscape Attributes

Brigadoon St. John's Wort is a dense multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Brigadoon St. John's Wort is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Brigadoon St. John's Wort will grow to be about 16 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Brigadoon St. John's Wort makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
