Height: 5 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 5

Other Names: E.H. Morse Rose

Group/Class: Hybrid Tea Rose

Description:

A showy garden rose producing vivid crimson-orange blooms with a hot pink cast and a strong fragrance; very disease resistant, deep green foliage; excellent for cutting; blooms in flushes throughout the season

Ornamental Features

Ernest H. Morse Rose features showy fragrant double crimson flowers with orange overtones and hot pink streaks at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Ernest H. Morse Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Ernest H. Morse Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Ernest H. Morse Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
