Height: 7 feet

Spread: 5 feet

Sunlight: ○

Hardiness Zone: 4

Other Names: Paul Néron Rose, Bishop's Lodge Sydney Linton Rose

Group/Class: Old Fashioned Rose

Description:

A graceful, tall variety that produces lovely, clear pink cup shaped blooms; a vibrant color addition that lights up the garden; needs full sun and well-drained soil; nearly thornless, great for cutting; light fragrance

Ornamental Features

Paul Neyron Rose features showy fragrant double pink cup-shaped flowers at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The serrated oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Paul Neyron Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Paul Neyron Rose is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Paul Neyron Rose will grow to be about 7 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Paul Neyron Rose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
