

Tall White Crown Of Thorns

Euphorbia milii 'Tall White'

Height: 6 feet

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 8

Other Names: Christ Plant, Christ Thorn

Description:

A visually striking shrub; vertically upright stems are woody and very thorny, crowned with bright green oval leaves; blooms seasonally with clusters of cream flowers; an excellent choice for a bright indoor area

Features & Attributes

Tall White Crown Of Thorns features showy clusters of creamy white flowers with buttery yellow eyes held atop the branches from early spring to late fall. Its attractive oval leaves emerge light green, turning green in color throughout the year.

This is a multi-stemmed evergreen houseplant with a narrowly upright and columnar growth habit. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Tall White Crown Of Thorns can be expected to grow to be about 6 feet tall at maturity, with a spread of 24 inches. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in sandy soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
