Plant Height: 26 inches

Flower Height: 4 feet

Spread: 3 feet

Spacing: 14 inches

Sunlight:

Hardiness Zone: 6

Other Names: Princess Lily, Peruvian Lily

Description:

This intriguing variety presents stunning white blooms, with pale pink throats, burgundy spots, and soft yellow flares; blooms last a long time as cut flowers; a lovely addition to indoor containers

Features & Attributes

Casablanca Alstroemeria features showy bracted white trumpet-shaped flowers with yellow overtones, shell pink throats and burgundy spots at the ends of the stems from late spring to mid summer. The flowers are excellent for cutting. Its pointy leaves remain green in color throughout the year.

This is an herbaceous houseplant with a rigidly upright and towering form. This plant usually looks its best without pruning, although it will tolerate pruning.

Planting & Growing

When grown indoors, Casablanca Alstroemeria can be expected to grow to be about 26 inches tall at maturity extending to 4 feet tall with the flowers, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
