Height: 3 feet

Spread: 28 inches

Spacing: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 7

Other Names: Lily of the Nile, Easter Lily, Arum Lily

Description:

A showy variety with large, lemon yellow spathes that deepen in color as they mature; broad, glossy foliage is speckled lightly with gray; great for indoor containers or baskets

Features & Attributes

Gold Rush Calla Lily features bold lemon yellow trumpet-shaped flowers with buttery yellow throats rising above the foliage from early summer to early fall. The flowers are excellent for cutting. Its attractive large glossy heart-shaped leaves remain dark green in color with distinctive gray spots throughout the year.

This is an herbaceous houseplant with tall flower stalks held atop a low mound of foliage. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Gold Rush Calla Lily can be expected to grow to be about 28 inches tall at maturity, with a spread of 28 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It requires an evenly moist well-drained soil for optimal growth. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
