Plant Height: 8 inches

Flower Height: 12 inches

Spread: 10 inches

Spacing: 8 inches

Sunlight:

Hardiness Zone: 7

Other Names: Lily of the Nile, Easter Lily, Arum Lily

Description:

A miniature variety with a high flower count; warm green, narrow, well shaped foliage embraces lovely ivory blooms with butter yellow centers; perfect for small indoor containers or baskets

Features & Attributes

Intimate Ivory Calla Lily features bold creamy white trumpet-shaped flowers with buttery yellow throats rising above the foliage from late spring to early fall. The flowers are excellent for cutting. Its attractive glossy pointy leaves remain dark green in color throughout the year.

This is an herbaceous houseplant with tall flower stalks held atop a low mound of foliage. Its wonderfully bold, coarse texture is quite ornamental and should be used to full effect. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Intimate Ivory Calla Lily can be expected to grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 10 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It requires an evenly moist well-drained soil for optimal growth. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
