Plant Height: 24 inches

Flower Height: 3 feet

Spread: 3 feet

Spacing: 18 inches

Sunlight:

Hardiness Zone: 7

Description:

This stunning variety produces rosettes of long burgundy leaves that mature to olive, then turn back after flowering; spikes of attractive creamy-pink flowers with lavender tones rise up in late spring; a great indoor container feature

Features & Attributes

Sparkling Burgundy Pineapple Lily features bold spikes of lightly-scented pink star-shaped flowers with creamy white overtones and lavender streaks from late spring to early summer. Its sword-like leaves emerge burgundy, turning olive green in color throughout the year. The dark red stems are very effective and add to the plant's interest.

This is an herbaceous houseplant with an upright spreading habit of growth. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Sparkling Burgundy Pineapple Lily can be expected to grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant requires direct sun for optimal performance, and should therefore be situated in a room that gets bright sunlight for a good part of the day; it is not a good choice for rooms lit only by artificial light. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
