Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 8

Description:

This exotic variety produces spectacular flowers that are noteworthy both for their intricate design and fragrance; flowers resemble spidery daffodils with 6 narrow petals and a large cup; a unique selection for indoor containers

Features & Attributes

Tropical Giant Spider Lily features showy spikes of fragrant white spider-like flowers with chartreuse eyes at the ends of the stems in mid summer. Its glossy sword-like leaves remain green in color throughout the year.

This is an herbaceous houseplant with a rigidly upright and towering form. This plant should not require much pruning, except when necessary to keep it looking its best.

Planting & Growing

When grown indoors, Tropical Giant Spider Lily can be expected to grow to be about 30 inches tall at maturity, with a spread of 3 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 8 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
