Description:

A pretty addition to indoor containers or baskets; Large, scalloped glossy leaves compliment clusters of lovely shell pink blooms; an easy to grow houseplant

Features & Attributes

Shell Pink Kalanchoe is covered in stunning clusters of shell pink trumpet-shaped flowers rising above the foliage from mid winter to early spring. Its attractive succulent round leaves remain dark green in color throughout the year.

This is an herbaceous evergreen houseplant with a mounded form. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Shell Pink Kalanchoe can be expected to grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It is very adaptable to both dry and moist soil, and should do just fine under average home conditions. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in sandy soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
