Carnival Candy Apple Coral Bells

Heuchera 'Candy Apple'

Plant Height: 12 inches

Flower Height: 18 inches

Spread: 14 inches

Spacing: 10 inches

Sunlight: ◐ ●

Hardiness Zone: 4

Other Names: Coralbells, Alumroot

Group/Class: Carnival Series

Description:

An amazing, colorful selection, in shades of copper, red, and green, with silver overlays; amazing contrast to other plants; great versatility; keep soil moist in heat of summer; spikes of pink and white flowers in late spring to early summer

Ornamental Features

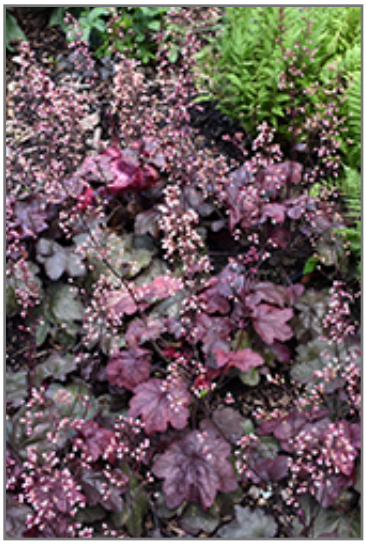

Carnival Candy Apple Coral Bells is primarily valued in the garden for its distinctive form, with the flower stalks towering over the foliage. It attractive crinkled lobed leaves emerge crimson in spring, turning brick red in color with showy coppery-bronze variegation and tinges of silver the rest of the year. The dark red stems can be quite attractive.

Landscape Attributes

Carnival Candy Apple Coral Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It has no significant negative characteristics.

Carnival Candy Apple Coral Bells is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Carnival Candy Apple Coral Bells will grow to be about 12 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in a location that gets morning sunlight but is shaded from the hot afternoon sun, although it will also grow in full shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Carnival Candy Apple Coral Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
