Allspice Magnolia

Magnolia x foggii 'Allspice'

Height: 18 feet

Spread: 8 feet

Sunlight: ○ ◐

Hardiness Zone: 9

Other Names: Banana Shrub Hybrid

Description:

This impressive, large, pyramidal shrub has lustrous evergreen leaves and richly fragrant creamy white flowers from early spring to summer; blooms at an early age

Ornamental Features

Allspice Magnolia features showy fragrant creamy white cup-shaped flowers along the branches from early spring to early summer, which emerge from distinctive coppery-bronze flower buds. It has dark green evergreen foliage. The glossy pointy leaves remain dark green throughout the winter.

Landscape Attributes

Allspice Magnolia is a multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Allspice Magnolia is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Allspice Magnolia will grow to be about 18 feet tall at maturity, with a spread of 8 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Allspice Magnolia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Its large size and upright habit of growth lend it for use as a solitary accent, or in a composition surrounded by smaller plants around the base and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
