Height: 3 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 5

Other Names: Heavenly Bamboo

Description:

Grown for its vibrant red and green foliage; the evergreen leaves are narrower and finer in texture than the species; very upright, leggy and open, excellent in mass plantings for textural effect

Ornamental Features

All-A-Glow Dwarf Nandina is primarily grown for its highly ornamental fruit. It features an abundance of magnificent creamy white berries from early fall to late winter. It has attractive red-variegated green foliage which emerges burgundy in spring. The narrow compound leaves are highly ornamental and turn an outstanding red in the fall, which persists throughout the winter. It has masses of beautiful clusters of creamy white flowers rising above the foliage from mid to late spring, which are most effective when planted in groupings.

Landscape Attributes

All-A-Glow Dwarf Nandina is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering

All-A-Glow Dwarf Nandina is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

All-A-Glow Dwarf Nandina will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in a location that gets morning sunlight but is shaded from the hot afternoon sun, although it will also grow in full shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

All-A-Glow Dwarf Nandina makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
