Plant Height: 12 inches

Flower Height: 16 inches

Spread: 8 inches

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Windflower

Group/Class: Harmony Series

Description:

A stunning variety with large, scarlet, double blooms sitting on top of sturdy stems and green fern like foliage; early bloomer producing flowers from early spring to the end of summer; perfect for borders, containers, massing and cut flower arrangements

Ornamental Features

Harmony Double Scarlet Anemone features bold double scarlet buttercup flowers with black eyes and a white ring at the ends of the stems from early spring to early fall. The flowers are excellent for cutting. Its ferny leaves remain green in color throughout the season.

Landscape Attributes

Harmony Double Scarlet Anemone is a dense herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Harmony Double Scarlet Anemone is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Harmony Double Scarlet Anemone will grow to be about 12 inches tall at maturity extending to 16 inches tall with the flowers, with a spread of 8 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Harmony Double Scarlet Anemone is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
