Height: 3 feet

Spread: 24 inches

Spacing: 3 feet

Sunlight:

Hardiness Zone: (annual)

Group/Class: Plum-Determinate

Description:

A beautiful variety that is early to mature and high yielding; produces sweet and meaty orange roma tomatoes; easy to peel makes them perfect for canning or sauces; ideal for large containers or gardens; requires staking or caging

Edible Qualities

Sunrise Sauce Tomato is an annual vegetable plant that is commonly grown for its edible qualities. It produces orange oval tomatoes (which are technically 'berries') with a yellow blush and yellow flesh which are usually ready for picking from mid summer to early fall. This is a determinate variety, which means it bears a full crop all at once. The tomatoes have a sweet taste and a distinctive fragrance.

The tomatoes are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Canning
- Sauces

Planting & Growing

Sunrise Sauce Tomato will grow to be about 3 feet tall at maturity, with a spread of 24 inches. When planted in rows, individual plants should be spaced approximately 3 feet apart. Because of its vigorous growth habit, it may require staking or supplemental support. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant can be difficult to integrate into a landscape or flower garden, and is best grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

Sunrise Sauce Tomato is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
