Height: 5 feet

Spread: 18 inches

Spacing: 24 inches

Sunlight: ○

Hardiness Zone: (annual)

Description:

Upright and self supporting, this easy to grow and low maintenance variety is ideal for large containers and sunny gardens; long, strong stems rise above foliage to feature beautiful golden orange blooms that reach 6" across; attracts birds and bees

Ornamental Features

Soraya Sunflower has masses of beautiful semi-double orange daisy flowers with gold overtones and brown eyes held atop the stems from mid summer to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its pointy leaves remain dark green in color throughout the season.

Landscape Attributes

Soraya Sunflower is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and may require the occasional pruning to look its best. It is a good choice for attracting birds and bees to your yard. It has no significant negative characteristics.

Soraya Sunflower is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Soraya Sunflower will grow to be about 5 feet tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.

Soraya Sunflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
