Labella® Grande Orange Bicolor Dahlia

Dahlia 'Labella Grande Orange Bicolor'

Height: 12 inches

Spread: 14 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Group/Class: Labella Series

Description:

Beautiful orange and yellow colored blooms are featured on this compact and heat tolerant variety; produces an impressive flower canopy all season long, showing off in patio containers, borders and garden beds; lovely addition to cut flower arrangements

Ornamental Features

Labella Grande Orange Bicolor Dahlia features showy double orange round flowers with gold overtones and yellow centers at the ends of the stems from mid summer to early fall. The flowers are excellent for cutting. Its serrated pointy leaves remain green in color throughout the season.

Landscape Attributes

Labella Grande Orange Bicolor Dahlia is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Labella Grande Orange Bicolor Dahlia is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Labella Grande Orange Bicolor Dahlia will grow to be about 10 inches tall at maturity, with a spread of 14 inches. This annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It does best in average conditions that are neither too wet nor too dry. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Labella Grande Orange Bicolor Dahlia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
