Height: 10 inches

Spread: 16 inches

Sunlight: ◐

Hardiness Zone: (annual)

Group/Class: Bella Series

**Description:**

Mounded with a trailing habit, this compact and heat tolerant variety is the perfect addition to patio containers and hanging baskets; a long season bloomer that features small green foliage, blanketed with dainty tubular, lilac-pink flowers

**Ornamental Features**

Bella Rosa Lobelia features dainty racemes of shell pink tubular flowers with lilac purple overtones and white throats at the ends of the stems from mid spring to mid fall. Its tiny narrow leaves remain green in color throughout the season.

**Landscape Attributes**

Bella Rosa Lobelia is an herbaceous annual with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Bella Rosa Lobelia is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Hanging Baskets

**Planting & Growing**

Bella Rosa Lobelia will grow to be about 10 inches tall at maturity, with a spread of 16 inches. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should be grown in a location with partial shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average conditions that are neither too wet nor too dry. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Bella Rosa Lobelia is a fine choice for the garden, but it is also a good selection for planting in hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
