Height: 24 inches

Spread: 18 inches

Sunlight: ◐ ●

Hardiness Zone: 10

Description:

A stunning accent plant featuring stunning, bright fuchsia flower spikes; blooms last a long time, ideal for indoor containers and hanging baskets; prefers indirect sunlight; easy to grow and low maintenance

Features & Attributes

Freya Guzmania Bromeliad features showy spikes of fuchsia flowers rising above the foliage from early spring to late winter. Its large sword-like leaves remain green in color throughout the year.

This is an herbaceous evergreen houseplant with an indistinguished habit of growth. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Freya Guzmania Bromeliad can be expected to grow to be about 20 inches tall at maturity, with a spread of 18 inches. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
