Height: 3 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 6

Other Names: Spotted Laurel, Japanese Laurel

Description:

This stunning evergreen solves the problem of the most shaded garden areas; shiny, dark green foliage is heavily variegated in tones of cream, yellow and gold; perfect for smaller spaces; drought tolerant once established; protect from cold winter winds

Ornamental Features

Cecil-Alice Aucuba has attractive yellow-variegated dark green foliage with hints of creamy white on a plant with a round habit of growth. The glossy pointy leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Cecil-Alice Aucuba is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Cecil-Alice Aucuba is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Cecil-Alice Aucuba will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It has a low canopy. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in a location that gets morning sunlight but is shaded from the hot afternoon sun, although it will also grow in full shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Cecil-Alice Aucuba makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
