Plant Height: 6 inches

Flower Height: 8 inches

Spread: 12 inches

Spacing: 14 inches

Sunlight:

Hardiness Zone: 8

Group/Class: Sunny Series

Description:

Compact bushy plants with dense foliage present gorgeous pink colored daisies with deep indigo eyes; mounded habit, perfect for patio containers, borders, mass planting and fresh cut arrangements; deadhead to encourage new growth

Ornamental Features

Sunny Atilla African Daisy is bathed in stunning pink daisy flowers with shell pink overtones and indigo eyes at the ends of the stems from early summer to mid fall. The flowers are excellent for cutting. Its spiny narrow leaves remain green in color throughout the year.

Landscape Attributes

Sunny Atilla African Daisy is an herbaceous evergreen perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Sunny Atilla African Daisy is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Sunny Atilla African Daisy will grow to be only 6 inches tall at maturity extending to 8 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sunny Atilla African Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
