Height: 30 inches

Spread: 30 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 5

Other Names: Compact Japanese Spindle

Description:

An impressive selection with distinctive greenish-white new foliage that gradually matures to a rich dark green; seaside salt tolerance; a great low hedge plant with a compact habit that will require little shearing for a formal appearance

Ornamental Features

Paloma Blanca Euonymus has attractive dark green foliage with hints of chartreuse which emerges white in spring on a plant with a round habit of growth. The small glossy oval leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Paloma Blanca Euonymus is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Paloma Blanca Euonymus is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Paloma Blanca Euonymus will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.

Paloma Blanca Euonymus makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
