Pink Frosting Hyacinth

Hyacinthus orientalis 'Pink Frosting'

Plant Height: 8 inches

Flower Height: 12 inches

Spread: 6 inches

Spacing: 4 inches

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Dutch Hyacinth

Description:

Highly fragrant, distinct pink and white blooms in spring, on robust, sturdy tall stems that will not fall over; plant among perennials and under leggy shrubs to get an early start on the growing season; also an attractive indoor accent plant

Features & Attributes

Pink Frosting Hyacinth has masses of beautiful spikes of fragrant pink star-shaped flowers with white overtones and hot pink stripes rising above the foliage from early to mid spring. Its grassy leaves remain bluish-green in color throughout the year.

This is an herbaceous houseplant with an upright spreading habit of growth. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant usually looks its best without pruning, although it will tolerate pruning.

Planting & Growing

When grown indoors, Pink Frosting Hyacinth can be expected to grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 6 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
