Height: 8 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ○ ◐

Hardiness Zone: 9

Other Names: Rock Isotome, Blue Star Flower, Solenopsis,

**Description:**

This variety features lovely, star shaped, violet-blue flowers that rise above ferny cut foliage; this compact mounded plant is great for border fronts, patio edging, or containers

**Ornamental Features**

Laurentia features showy lavender star-shaped flowers with violet overtones rising above the foliage from late spring to mid fall. Its attractive deeply cut ferny leaves remain green in color throughout the season.

**Landscape Attributes**

Laurentia is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Laurentia is recommended for the following landscape applications;

- Accent
- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

**Planting & Growing**

Laurentia will grow to be about 8 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This species is not originally from North America.

Laurentia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
