Blue Carpet Spanish Stonecrop

Sedum hispanicum 'Blue Carpet'

Plant Height: 2 inches

Flower Height: 3 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: 4

Other Names: Glaucous Stonecrop

Description:

A compact, mat-forming variety presenting whorls of small, cylindrical pale blue to gray-green leaves that will flush purple in winter; clusters of pink flowers appear in summer; a very attractive groundcover with a fine texture

Ornamental Features

Blue Carpet Spanish Stonecrop is bathed in stunning pink star-shaped flowers at the ends of the stems from mid to late summer. Its attractive tiny succulent needle-like leaves are silvery blue in color with hints of grayish green. The foliage often turns purple in fall.

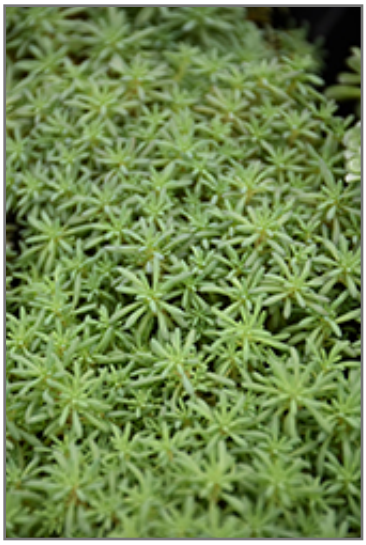

Landscape Attributes

Blue Carpet Spanish Stonecrop is a dense herbaceous evergreen perennial with a ground-hugging habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Blue Carpet Spanish Stonecrop is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Blue Carpet Spanish Stonecrop will grow to be only 2 inches tall at maturity extending to 3 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Blue Carpet Spanish Stonecrop is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
