Plant Height: 12 inches

Flower Height: 16 inches

Spread: 14 inches

Sunlight: ○

Hardiness Zone: 5

Other Names: Jewel Of The Sierra Madre, Pink Hummingbird Mint

Description:

This variety produces glorious fragrant spikes of long blooming, shell pink flowers; strong, compact form is great in borders and containers; for the best performance plant in fertile, well-drained soil in full sun

Ornamental Features

Sunny Sparks Pink Glow Hyssop features airy spikes of fragrant shell pink tubular flowers rising above the foliage from late spring to early fall, which emerge from distinctive rose flower buds. The flowers are excellent for cutting. Its attractive fragrant narrow leaves remain green in color throughout the season.

Landscape Attributes

Sunny Sparks Pink Glow Hyssop is an open herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Sunny Sparks Pink Glow Hyssop is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Naturalizing And Woodland Gardens
- Herb Gardens
- Container Planting

Planting & Growing

Sunny Sparks Pink Glow Hyssop will grow to be about 12 inches tall at maturity extending to 16 inches tall with the flowers, with a spread of 14 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 6 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is particular about its soil conditions, with a strong preference for rich, alkaline soils, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sunny Sparks Pink Glow Hyssop is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
