**Description:**

A low maintenance and drought tolerant variety with a vigorous, mounded habit; presents eye-catching deep grey-green foliage with silver centers and variegation with deep red undersides; suitable for indoor or outdoor use in shaded containers or beds

**Features & Attributes**

Jurassic Megalo Komodo Begonia's attractive large twisted heart-shaped leaves remain dark green in color with showy silver variegation throughout the year on a plant with a mounded habit of growth.

This is an herbaceous evergreen houseplant with a mounded form. This plant usually looks its best without pruning, although it will tolerate pruning.

**Planting & Growing**

When grown indoors, Jurassic Megalo Komodo Begonia can be expected to grow to be about 24 inches tall at maturity, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 3 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It is very adaptable to both dry and moist soil, but will not tolerate any standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
