Height: 4 feet

Spread: 5 feet

Sunlight: ◐ ●

Hardiness Zone: 5

Other Names: Doghobble, Dog Hobble

Description:

A compact shrub featuring rich, thick, dark green foliage on arching branches; pretty racemes of urn-shaped, fragrant white flowers in spring, compliment the interesting foliage; flowers well, and is best in part-shade; very resistant to leaf spot disease

Ornamental Features

Margie Jenkins Fetterbush is blanketed in stunning racemes of fragrant white bell-shaped flowers along the branches from mid to late spring. It has attractive dark green evergreen foliage which emerges brick red in spring. The large glossy oval leaves are highly ornamental and turn an outstanding burgundy in the fall, which persists throughout the winter. The smooth coppery-bronze bark adds an interesting dimension to the landscape.

Landscape Attributes

Margie Jenkins Fetterbush is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Margie Jenkins Fetterbush is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Margie Jenkins Fetterbush will grow to be about 4 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. It may require supplemental watering during periods of drought or extended heat. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This is a selection of a native North American species, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Margie Jenkins Fetterbush makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
