Height: 4 inches

Spread: 6 inches

Sunlight:

Hardiness Zone: (annual)

Other Names: Ornamental Chili, Chili Pepper

**Description:**

This variety produces dense clusters of showy fruit, upward facing atop the plant; peppers emerge green, progress to orange, then eventually mature to red; a stunning color display for hot, bright locations, or containers

**Ornamental Features**

Salsa Orange Ornamental Pepper is primarily grown for its highly ornamental fruit. The fruits are showy yellow peppers with orange overtones and which fade to red over time, which are carried in abundance from mid summer to early fall. Its attractive pointy leaves remain dark green in color throughout the season. It features subtle white star-shaped flowers dangling from the stems from late spring to mid summer.

This plant is primarily grown as an ornamental, but it's also valued for its edible qualities. The oblong spicy peppers are most often used in the following ways:

- Cooking
- Baking
- Preserves
- Drying
- Seasoning
- Sauces

**Landscape Attributes**

Salsa Orange Ornamental Pepper is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Salsa Orange Ornamental Pepper is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Herb Gardens
- Container Planting
- Hanging Baskets

**Planting & Growing**

Salsa Orange Ornamental Pepper will grow to be only 4 inches tall at maturity, with a spread of 6 inches. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Salsa Orange Ornamental Pepper is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
