Plant Height: 12 inches

Flower Height: 16 inches

Spread: 22 inches

Spacing: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 6

Group/Class: Fashionista Collection

Description:

An attractive compact variety with a dense, upright habit, producing impressive spikes of fragrant, lavender-pink flowers; an excellent garden performer on the cutting edge of perennial fashion

Ornamental Features

Fashionista Sweet Petite Sage has masses of beautiful racemes of fragrant pink tubular flowers with lavender overtones rising above the foliage from late spring to early summer, which emerge from distinctive rose flower buds, and which are most effective when planted in groupings. The flowers are excellent for cutting. Its tomentose narrow leaves remain green in color throughout the year.

Landscape Attributes

Fashionista Sweet Petite Sage is an herbaceous evergreen perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Fashionista Sweet Petite Sage is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Fashionista Sweet Petite Sage will grow to be about 12 inches tall at maturity extending to 16 inches tall with the flowers, with a spread of 22 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in rich soils, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Fashionista Sweet Petite Sage is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
