Height: 20 inches

Spread: 20 inches

Spacing: 20 inches

Sunlight:

Hardiness Zone: (annual)

Group/Class: Cheery/Grape-Determinate

Description:

A low growing semi-determinate variety with a trailing habit, ideal for hanging baskets and patio containers; abundant yields of 1" round, bright red cherry tomatoes are produced over a long harvest period; great for pickling, lunchboxes or salads

Edible Qualities

Lizzano Tomato is an annual vegetable plant that is typically grown for its edible qualities. It produces small clusters of red round tomatoes (which are technically 'berries') with red flesh which are usually ready for picking from mid to late summer. This is a determinate variety, which means it bears a full crop all at once. The tomatoes have a pleasant taste and a firm texture.

The tomatoes are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Pickling
- Canning

Planting & Growing

Lizzano Tomato will grow to be about 20 inches tall at maturity, with a spread of 20 inches. When planted in rows, individual plants should be spaced approximately 20 inches apart. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant can be difficult to integrate into a landscape or flower garden, and is best grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant is a heavy feeder that requires frequent fertilizing throughout the growing season to perform at its best. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

Lizzano Tomato is a good choice for the vegetable garden, but it is also well-suited for use in outdoor containers and hanging baskets. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
