Height: 12 inches

Spread: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 8

Description:

A striking, compact fuchsia variety featuring nodding flowers of deep rose-purple and shell pink against the green foliage; a dense, self supporting round shrub that is perfect as an indoor accent plant

Features & Attributes

Fairy Lights Fuchsia features dainty nodding rose bell-shaped flowers with purple overtones, white eyes and shell pink calyces along the branches from early summer to mid fall. Its attractive serrated pointy leaves remain dark green in color throughout the year.

This is a dense multi-stemmed houseplant with a more or less rounded form. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Fairy Lights Fuchsia can be expected to grow to be about 12 inches tall at maturity, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
