Height: 12 inches

Spread: 14 inches

Spacing: 14 inches

Sunlight:

Hardiness Zone: 8

Other Names: Vervain

Group/Class: Lascar Series

Description:

An early flowering series featuring a compact mounded habit; bright and beautiful flowers sit among medium green foliage; heat tolerant and low maintenance; excellent for hanging baskets, containers and landscapes

Ornamental Features

Lascar Compact Burgundy Verbena features showy clusters of burgundy star-shaped flowers at the ends of the stems from late spring to mid fall. The flowers are excellent for cutting. Its small tomentose narrow leaves remain green in color throughout the season.

Landscape Attributes

Lascar Compact Burgundy Verbena is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Lascar Compact Burgundy Verbena is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Lascar Compact Burgundy Verbena will grow to be about 12 inches tall at maturity, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 3 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Lascar Compact Burgundy Verbena is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
